

Dear customers and consumers,

Now that after 30 years of experience in high quality production of all kinds of wire and cable products at different voltage levels up to 63kv and various uses, we are at your service, we must announce that the Mashad Wire and Cable brand, like all other major and reputable brands, which produce very high quality products, unfortunately, Mashad Wire and Cable Company was not safe from the sting of fraudsters and low-quality products that use the name and brand of Mashad Wire and Cable.

It should be noted that during the tested samples of suspicious and non-standard products, it was found that between 30% and 60% and in one product was 80% less than the declared size (it is also observed that CCA conductors are used in these power products.)

We consider it our duty to inform consumers and remind them that the products of Mashad Wire and Cable Industries Company are produced only with this name and without any suffixes and prefixes, and all our products are produced only with the Mashad brand name. Wire and Cable Industries is offered at the level of authorized agents and sales offices, which are listed below. The important thing is that the original QR code is included on all our products, which will inform you of the information of the sales offices and the latest changes by scanning it. We hope that in line with this notification, no counterfeit and low-quality products will be available in the consumer market, and with this action, we will take a step towards protecting and defending the rights of consumers.

The original sample of the product label
Mashad Wire and Cable Company

Mashad Wire and Cable Company

Distinguished National Quality Unit selected by the Institute of Standards and Industrial Research of Iran in 2021

Distinguished Quality Unit selected by Khorasan Razavi Standards Department in 2021

Distinguished National Quality Unit selected by the Institute of Standards and Industrial Research of Iran in 2019

(In the electricity, wire and cable industry of the country)

Mashad Wire and Cable Company, manufacturer of low, average and high voltage cables, data and instrumentations and the only owner of 132 kV high voltage laboratory and 17025 laboratories of HFFR and silicone (Rubber) fireproof cables and telecommunication and network cables in the east of the country and selected distinguished from different organizations of the country as follows:

1. Distinguished National Quality Unit in the field of wires and cables from the Institute of Standards and Industrial Research of Iran in 2019 and 2021
2. Distinguished Quality Unit from the Institute of Standards and Industrial Research of Iran (Khorasan Razavi) in the years 1999-2000-2002-2003-2004-2006-2008-2011-2014-2016-2017-2018-2019-2020-2021
3. Distinguished provincial exporter of wire and cable in 2013-2014-2015-2016-2017-2018-2019-2020-2021
4. Distinguished standard Collaborating Laboratory in 2013
5. Collaborating Laboratory of the Research Institute of the Ministry of Energy
6. The holder of the confirmation of presence in the list of manufacturers and suppliers of all kinds of wires and cables of electricity distribution companies and transformers all over the country
7. The holder of the confirmation of presence in the list of manufacturers and suppliers of all kinds of wires and cables of Iran's petroleum products companies, firefighting organizations and municipal safety services across the country.
8. The holder of the confirmation of presence in the list of manufacturers and suppliers of all kinds of wires and cables of universities of medical sciences, subway and urban train of Tehran, Central Iron Ore Company and Khuzestan Steel Company
9. The distinguished research and development (R&D) center in the country in 2016
10. The distinguished research and development center of the province in 2019
11. Director of superior quality control from Institute of Standards and Industrial Research of Iran from 2003 to 2021 (18 periods)
12. Winning the golden statue of the distinguished national brand in 2018
13. Top entrepreneur in 2013-2014-2015-2017-2018
14. The first and only producer of average voltage and high voltage cables in the northeast of the country
15. Obtaining the provincial consumer rights protection certificate and statue in 2016-2017-2018-2019
16. Obtaining the national consumer rights protection certificate and statue in 2017-2018-2019
17. Holding the national mark of the distinguished wire and cable product approved by electrical and electronic technicians in the country (January 2017)
18. Obtaining approval (Type Test) of all copper and aluminum cables up to 300 square millimeters cross-section and self-supporting cables and ACSR wires from Tavanir Company - (approved by electricity and regional electricity distribution companies in 32 provinces of the country)
19. Obtaining grade A of MAPNA power plant projects
20. Obtaining the title of Distinguished Industrial Unit from the Organization of Industry, Mining and Trade in 2013-2014-2015-2016-2017-2018-2021-2022
21. The national mark of the distinguished wire and cable producer from the National Industrial Development Organization of Iran at the National Endurance Summit in the production of goods and services
22. National emblem of the most successful management in the development of national productions
23. The first manufacturer of network cables (fluke pass) with ANSI standard and equipping the first and only laboratory of 17025 of telecommunication and Cat5, Cat6, Cat7 network cables in Iran
24. Participation in the development of IEC international standards and active membership in the national electrical and electronic technical committees of INEC TC20 electrical cables and winding wires (INEC TC55)
Manufacturer of low, average and high voltage wires and cables (10-63kv)

In electricity transmission and distribution lines * oil and gas and petrochemical industries * telecommunication industries and instrumentations * electrical and electronic industries * marine and railway industries * dater and dam industries * power plant projects and solar power plants (solar) * automotive industries * subway and wagon manufacturing industries * building and towers construction industries * medical and hospital industries

Introducing Acrodite Laboratories of Mashad Wire and Cable Factories Group

Having national qualification approval from Institute of Standards and Industrial Research of Iran

1. Acrodite Laboratory, Mashad Wire and Cable Company, the first holder of ISO/IEC 17025 certification in the northeast of the country from the Institute of Standards and Industrial Research of Iran, issued under number NACI/LAB/349

2. Acrodite Laboratory of Khorasan telecommunication wire and cable, as the only holder of the national qualification approval certificate in the field of testing telecommunication, network and coaxial, halogen-free, silicon and rubber cables, issued under number NACI/LAB/441

Acrodite Laboratories of Mashad Wire and Cable Factories Group hereby announce their qualification approval regarding parts 1 to 6 as follows:

Wires and cables with polyvinyl chloride insulation with nominal voltage up to 450/750 volts (607 series national standard)

Wires and cables with a nominal voltage of 1 kV (UM=1.2 kV) and 3 kV (UM=3.6 kV)

Part 1: National Standard 3569-1 (wires and cables with PVC, PE, XLPE, EPR, HEPR insulation)

Power cables with extruded insulation with a nominal voltage of 6 kV (UM=7.2 kV) up to 30 kV (UM=36 kV)

Part 2: National Standard 2-3569 (cables with PVC, PE, XLPE, EPR, HEPR insulation)

Power cables with extruded insulation with a nominal voltage of 36/63Kv (72Kv), standard IEC60840 and ISIRI9701

Cables with insulation and thermoplastic coating, halogen-free and low smoke with nominal voltages less than or equal to 750/450 volts

Part 3: Standard 20000-3 (flexible cords/cables)

Cables with rubber insulation with nominal voltage up to 450/750 volts

Part 3: Standard 1926-3 (heat-resistant cables with silicone insulation)

Part 4: Standard 1926-4 (cables with rubber insulation)

Performing all tests of copper, aluminum AAC, ACSR bare air wires, automotive wires, telecommunication cables, CAT5e and CAT5 network cables, coaxial cables according to JIS, IEC, VDE, BS, DIN, ASTM standards or any type of standard set by the customer(s).

Applicable tests:

1. Carrying out tension and pressure tests up to 5000 Newton
2. All cooling tests up to - 40 degrees Celsius
3. All heating tests up to 250 degrees Celsius
4. Measuring the hardness of thermoplastic materials (PE, PVC) based on Shore D
5. Performing electrical tests up to the maximum voltage of 120KvAC and 15KvDC
6. Carrying out low voltage, average voltage and high voltage wire and cable tests
7. Performing the PD test and tangent delta ($\tan \delta$)
8. Impulse test (up to 500 kV) on average and high voltage cables
9. Carrying out HOTSET tests for XLPE insulation
10. Conducting tests of halogen-free and fireproof cables (HFFR)
11. Carrying out Acoustic tests (NEXT), return loss (RL), attenuation (IL), characteristic impedance and capacitance on telecommunication, network and coaxial cables.
